

Docket #98N-1038, "Irradiation in the production processing and handling of food."

On behalf of myself & my local natural foods co-op, I urge the FDA to keep prominent labeling on irradiated foods, & to allow no expiration date for this labeling. People must know what they are buying, & according to a Sept. '97 CBS news poll, 77% of people are against food irradiation. This process effectively makes all food "dead", even fruits and vegetables. If it must be done, LABEL IT.

98N-1038
